

Design a Plant Activity

- Select a biome from the list at the bottom.
- You are going to **design** (you are creating, not drawing one that already exists) a plant that would be best suited for the biome that you chose.
 - Think about the following to help in creating an original plant: (Use your biome notes)
 - **Climate** conditions
 - Type of **animals** that live in that biome in order to give your plant **adaptations** that will help it survive.
 - **Draw** your plant in detail
 - **Label and describe** at least **3 adaptations** that are unique to your plant. Write them next to where the adaptation is on your drawing.
 - Name your plant
 - It must be colored. Be creative & neat!

1. Rainforest
2. Temperate Forest
3. Grassland
4. Taiga
5. Desert
6. Tundra
7. Freshwater
8. Saltwater

EXAMPLE ONLY

Name(s) _____

Date: _____ Period: _____

Name of Plant: _____

Biome: _____
